Total Hours of Instruction: 30

Courses transferable to ECTS

Courses transferable to U.S. System

Requisite: online placement exam

Description

This workshop is designed for future teachers of Spanish as a Second and Foreign Language. The course consists of three modules, which combine independent study of theoretical material, observation of classes at different levels and the planning and execution of a teaching activity.

The aim of the course is to provide participants with an opportunity for a Spanish teaching practice that will prepare them for their future teaching practices, as the course also encourages a critical and self-reflective attitude about one's own teaching.
